

Observations of Metamorphosis - Tadpole to Frog

Name of Scientist: _____

Date	Use words to describe the frog/tadpole.	Use colored pencils or markers to draw what you see.
Time	<ul style="list-style-type: none">- Color, body parts, size, movement, etc.- How does it breathe?- What is it eating?- How has it changed since last observation?	

*Frogs are amphibians. They can use their lungs on land, or, when underwater, absorb oxygen through their skins. Tadpoles breathe underwater using gills.
